

Quality and Sustainability in Immunoassay and HPLC solutions

At Tosoh Bioscience, we have understood the importance for every laboratory to provide clinicians with state-of-art, reliable and sustainable *patient diagnostics tools*.

Tosoh Corporation, world leader in fine chemicals and parent company of Tosoh Bioscience, has developed a number of innovative technologies and is recognised as a global market leader in HPLC. Tosoh Bioscience is proud to present at EUROMEDLAB Amsterdam 2007 the latest of a long series of HbA1c and β -Thalassaemia monitoring solutions: the **G8**.

Tosoh Bioscience will also be featuring at EUROMEDLAB Amsterdam 2007 its family of Immunoassay analysers (**AIA-360**, **AIA-600II**, **AIA-1800**) which incorporates high stability dry unitary cup technology, together with built-in Japanese reliability and lifelong value.

Our **AIA-1800** and **G8** analysers are both compatible with Total Laboratory Automation organizations.

Finally, EUROMEDLAB Amsterdam 2007 is an opportunity for Tosoh Bioscience to present its latest innovation: the Real-Time Molecular Detection **TRCR-160** platform.

Tosoh Bioscience's solution at EUROMEDLAB Amsterdam 2007 line-up includes:

- **AIA-1800** Fully automated EIA Analyser: 180t/h for high volume laboratories
- **AIA-600II** Automated EIA Analyser: 60t/h for medium and satellite laboratories
- **AIA-360** Automated EIA Analyser: 36t/h for STAT testing and small laboratories
- **G8** HPLC Analyser for HbA1c and β -Thalassaemia
- **TRCR-160** Molecular Detection Platform
