TOSOH

TRCReady® MTB Kit

TOSOH BIOSCIENCE

Rapid detection of *M. Tuberculosis* complex for better patient management and outcome

Reliability

- 16S rRNA target
- Internal amplification control
- Amplification and detection step in a sealed tube minimising contamination

Speed and Simplicity

- Fully automated sample purification, amplification and detection
- Ready to use, single use reagents and disposables
- Automatic instrument, reagents, and disposables positions checks

Flexibility

- No need for batching
- Purified samples available for 2 runs
- Possibility to run only amplification and detection step

High sensitivity and specificy for 8 tests in 40 minutes
